Deputy Director (Administration)

27 February 1951

Advisor for Management

Register of Soviet Scientists, PRC Action, OGD 71-51-52.

25X1A9a

1. The matter of reproduction of the Register of Soviet Scientists authorized for production by subject PRC action has been discussed with Mr. [REDACTED] of the Office of Collection and Dissemination, Mr. Peel, Chief, Administrative Services, and Mr. Saunders, Comptroller. Certain basic factors require further development before final recommendation can be made as to the method of reproduction to be utilized. Both mimeograph and offset are suitable. However, Mr. Peel advises that multigraph is not authorized for government use.

2. In view of the fact that production of the Register is still in the formative stages and that by terms of the PRC action reproduction will begin about one year from date of project initiation, it is recommended that determination as to method of reproduction be held in abeyance until early September 1951. This recommendation has the concurrence of the individuals named in paragraph 1, above.
